

Appointment Management System – User Stories

Overview

This document outlines the user stories for an appointment management system designed to help healthcare providers and professionals manage their appointments efficiently.

User Stories

1. User Onboarding

As a new user, I would like a small introduction on how to use the appointment system.

2. Appointment Creation

As a user, I would like to set an appointment on a particular date, preferably by clicking on a date.

3. Appointment Deletion

As a user, I would like the ability to delete an appointment on a particular date, preferably by clicking on the date.

4. Appointment Update

As a user, I would like the ability to update an appointment on a particular date, preferably by clicking on the date.

5. Appointment View

As a user, I would like the ability to view all my appointments and have a feature to color-code categories for a quick overview.

6. Sorting and Filtering

As a user, I would like to sort appointments based on patients as well as category.

7. Today's Dashboard

As a user, I would like a panel that shows me all appointments for today.
